ORGANIZATION CHART

GUIDING PRINCIPLES OF RKC

TEAM WORK

- Working in collaboration with colleagues, customers and consultants for the maximum benefit of the project
- Sharing skills and knowledge, encouraging and supporting others to excel
- Inspiring a “one team” culture, delivering joint outcomes
- Listen to the needs and expectations of others before acting

INNOVATION

- Constantly strive to develop the most effective solutions to exactly suit the needs of the clinicians and their needs, improving the designs for maximum benefits of the project.
- Create individuality in all projects with the user at the heart of the design.
- Incorporate the latest technology in all facilities for true future proof environments
- Develop aesthetics alongside functionality, not instead of functionality

TRUST

- Act with the highest Integrity at all times and ALWAYS do the right thing
- Communicate openly and honestly with all parties, listening carefully to their needs
- Stand by difficult decisions and openly acknowledge errors
- Use initiative to solve problems and inform others when aware of potential issues

OUR METHODOLOGY

Customer Focused Partnership

✓ **Alignment with customer objectives**

✓ **Alignment with customer objectives**

✓ **Delivery within/exceeding customer expectations**

OUR PROJECTS

6000+ PROJECTS

- OUR GOAL IS TO EXCEED OUR CLIENTS EXPECTATIONS THROUGH
- TRANSPARENCY, PROFESSIONALISM, AND PRECISION.
- CLOSE TO OUR CUSTOMERS WHEREVER THEY ARE

SERVICES

Skilled Engineers is a full-fledged contracting company providing clients with a comprehensive range of civil ground, construction, architectural, and interior design services in the Kingdom of Saudi Arabia.

We believe that each client and project have a unique set of goals and expectations, so we provide a variety of services to achieve those goals. Our team guides each client through these service options to ensure all their needs are met.

We study each project to customize a specified approach for it. Being at the forefront of building design, we are delivery methodology experts; therefore we can confidently assist our clients in the way they desire.

OUR PORTFOLIO OF SERVICES INCLUDES BUT IS NOT LIMITED TO:

CIVIL GROUND-WORK

Skilled Engineers has established a proven track record in groundwork and major civil engineering projects, ranging from turnkey construction projects to social and private housing developments. We constantly find ourselves in leading roles as the primary contractor or sub-contractor.

Our scope of work embraces every aspect of the construction cycle from the initial site survey to liaising with the Project Engineer on:

- Land maximization
- Re-profiling the earthworks to required design levels
- Drainage and roads
- Bridges
- Foundations and buildings
- Ground floor slab
- Surfacing finishing touches

We have earned a strong reputation as a quality provider, solving complex problems. Moreover, we successfully deliver projects on either a stand-alone basis or as part of a consortium, offering a larger package to major contractors, local authorities, and consulting engineers.

CONSTRU-CTION

The term construction services cover a wide spectrum of responsibilities in the course of the building process. From design to completion, there is a plethora of services and parameters that should be taken care of such as architectural, electrical, mechanical, and metalwork.

To ensure that all project aspects are covered according to schedule and that operations are running smoothly without mistakes that might cause delays; the following construction stages are planned carefully:

- Assembling or building infrastructure.
- Site foundations, preparations, electrical work, mechanical work, and any work required to complete projects
- Water and sewage networks installation
- Heating/cooling systems installation

Monitoring the buildings life cycle after the completion of a project is also fundamental

to its quality and for the well-being of its residents, visitors, or employees.

ARCHITECTURAL WORK

To do this, our team of architects discuss different building styles with clients, learn their design preferences, and set a budget, to provide them various design options.

We then take all the necessary measurements to begin the development of the architectural preliminary design, which includes

- The building plan.
- Plan of engineering constructions.
- Composite map of the decoration

Skilled Engineers is passionate about applying innovative exterior design in line with the Saudi building codes and standards. We care about the architectural details, for it reflects on the result: we make sure to choose design elements that harmoniously create a dazzling exterior that reflects luxury.

RENOVATION & MAINTENANCE

The size and scale of expertise we have in the renovation industry are immense. This is crucial for us to achieve our clients' renovation dreams. We have learned to visualize what our clients have imagined to bring it into reality. Skilled Engineers combine skill and professionalism in addition to practicing due diligence when completing

WHEN WE HANDLE A RENOVATION PROJECT WE USE INNOVATIVE APPROACHES TO PRESERVE THE BUILDING'S HISTORY AND CHARACTER, WHILE GIVING IT THE LOOK AND FEEL OF A NEW ONE.

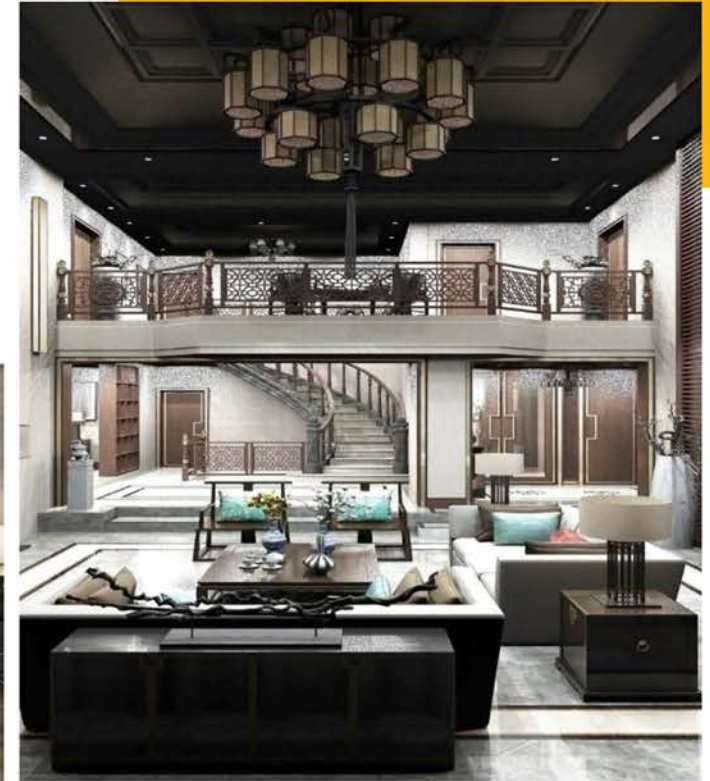

INTERIOR DESIGN

We turn your vision into reality. Through great planning and precision, our specialized interior designers strive to deliver client requirements in an optimized timeframe within budget, and highest quality performance

WE OFFER A SET OF INTERIOR DESIGN SERVICES THAT INCLUDE:

- Project management.
- Space planning.
- Style consultation.
- Lighting placement.
- Furniture and purchasing.
- Coloring consultation.

MEDICAL CONSTRUCTION

The term construction services cover a wide spectrum of responsibilities in the course of the building process. From design to completion, there is a plethora of services and parameters that should be taken care of such as architectural, electrical, mechanical, and metalwork.

To ensure that all project aspects are covered according to schedule and that operations are running smoothly without mistakes that might cause delays; the following construction stages are planned carefully:

- Assembling or building infrastructure.
- Site foundations, preparations, electrical work, mechanical work, and any work required to complete projects
- Water and sewage networks installation
- Heating/cooling systems installation
- Medical Equipment pre-installation.
- Medical Planning.

- material vendors.

AN OVERVIEW OF OUR METICULOUS PROCESS:

**Prince Sultan Bin Abdulaziz Street
P.O Box 301328 Riyadh 12223
Projects@riyadh-alkhozamah.com
www.riyadh-alkhozamah.com**

A construction worker wearing a yellow hard hat and a red safety vest with reflective stripes is shown in profile on the left side of the image. He is holding a white pen and pointing it towards a large, detailed architectural model of a city. The model features numerous skyscrapers, residential buildings, and a complex network of roads and highways. In the background, a tall construction crane is visible against a dark, overcast sky. The entire scene is dimly lit, with the primary light source being the text and the worker's vest.

THANK YOU
